COVID jabs saved ZERO lives while killing many, scientist warns

02/22/2024 // Ethan Huff // **1.5K** Views

Premier scientist Denis Rancourt [says that](#) not a single life was saved by Wuhan coronavirus (COVID-19) "vaccines" – but *plenty* were injured or *ended altogether* as a result of the chemical poisons.

Rancourt and several fellow scientists conducted an analysis of COVID injection data in which they determined that all-cause mortality *increased* every time another COVID jab was

released, whether it was the initial series or a subsequent "booster" shot.

For every 800 injections administered, Rancourt et al. learned that there was at least one jab-related death, this as outlined in a 180-page paper they published on the matter.

This one-death-per-800-doses figure becomes even more disturbing when considering how many doses of the shots were administered. At the time when Rancourt and his colleagues put together the report, 13.5 billion COVID jabs had been injected into people's bodies.

"Divide that number by 800 and you end up with approximately 17 million COVID-19 vaccine-related deaths," noted *The Vigilant Fox* on X, also sharing the following video from Dan Skorbach.

"NO LIVES WERE SAVED" by the COVID-19 injections, says researcher and scientist [@denisrancourt](#).

In fact, Rancourt and his fellow scientists found in their analysis that all-cause mortality INCREASED every time the COVID-19 shots were deployed.

Here's the 50,000-foot view:

(Related: French politicians are trying to [make it a crime](#) to oppose mRNA injections – violators to face fines in excess of 45,000 euros, along with three years of jail time for questioning "the science.")

Operation Warp Speed brought heart destruction

Electrical engineer John Beaudoin has been [probing the data](#) in his home state of Massachusetts as well, coming to similar conclusions about the ugly nature of COVID jabs.

Upon looking through the death database compiled by the Massachusetts Department of Health, Beaudoin found that 2020 "was a year of excess respiratory [deaths]," followed by a change in 2021 after Operation Warp Speed unleashed COVID injections on the world.

ADVERTISEMENT

Beaudoin found that excess respiratory deaths actually went *down* in 2021 after the jab's release "while at the same time, the blood and circulatory causes of death went up instead of down."

In other words, the coughs and colds that people suffering during the COVID "pandemic" largely disappeared after the Trump regime launched the shots in late-December of 2020, only to be replaced by many now-known adverse events stemming from COVID shots.

"So what people are dying from, they're dying from ... cardiac stroke, pulmonary embolism, gastrointestinal hemorrhages, aortic arch dissections, more than the respiratory, which went down at the same time," Beaudoin said.

To this very day, Donald Trump takes credit for the shots, which he has called "beautiful" and "effective" on many occasions. On many instances, Trump called COVID shots his "greatest accomplishment," patting himself on the back for getting them released at warp speed.

"No one is making him accountable for signing all the policies that allowed those poison shots to be made, and then distributed by our own military," a commenter at *The Epoch Times* noted about Trump and his supporters.

"There needs to be an accounting, and it needs to start with Trump. He needs to admit his failures. I cannot vote for someone who can't admit his own failures."

Another wrote that Americans need to put their political differences aside and come together to make sure the nation's leaders never again try to unleash another COVID-like nightmare on the country.

"We are at war," this person wrote. "No compliances is the narrow path that will lead to life moving forward."

It is never a good idea to get injected for COVID. Find out more at [ChemicalViolence.com](https://www.chemicalviolence.com).
